Students from the 6th Primary school of Piraeus send a message to the world.

Life Then, and Now...

Our School

The 6th Primary school is in the heart of Piraeus. It is in Dervenakion street, in the Maniatika area. The school was built in 1932 and people admired it. They proudly called it the "Parliament of Piraeus" and "Dukas" school because there was a private school with that name nearby. During the bombing of Piraeus in 1944, it was used to house the homeless. Our school has a long and important history, and today it is a place of friendship, full of life and learning. It is a three-storey building with many classrooms with high ceilings. Except for its regular classrooms it has an Art room, a music room and an event hall for students to express their creativity. Outside, at the schoolyard there is a basketball and a handball court. The reason for the success of our school is its principal. She works hard every day to make sure the school is constantly improving. Under the care of the principal and the teachers, it provides students with all the necessary tools to build their future in a modern, safe and inspiring environment.

The Beauty of Love

Love is what you will always need in your life. Love has two sides. One is positive, when we think of friendship or when the love of your life is by your side and supports you in everything you do. However, there is also a negative side. This is when a friend leaves you because they did not care about you. But trust me, no one should go through that. Love yourself and do not listen to haters. You are loveable just the way you are.

Μαρίνα-Μαρινέτ, Ειρήνη-Άννα, ΣΤ1

Friendship Tips

Friendship is when you love and appreciate another person. Friendship is when you have fun with those you call friends, but you must also love and take care of them. When you want to be a good friend, you should not tell lies to them. You should respect and love each other!

Δανάη, Αλίκη, Ε1

The Stone Age

The Stone Age was a very long period in history. It lasted about 3.4 million years. It took this name because people used stone to make their tools. People who lived during that period were hunters-gatherers, because they had to hunt animals and gather wild vegetables. There is some evidence that Stone Age people used fire. Before that, they ate their meat raw.

The World of science

The Moon

The moon can be seen in the night. It is 238,854 miles away which is 30 times the width of our Earth. Sometimes there is a full moon that has a bloody colour. It takes 27,3 days for the Moon to travel all the way around the Earth and it is a lot smaller than the sun. It takes light from the sun and that is how we have light in the night. But the Moon is also visible during daylight, almost every day. From the Earth it looks as if the Moon is changing its shape. The Moon has almost no atmosphere and it can be seen with the naked eye. Without the atmosphere, the Moon's environment is not protected from heat or cold and you cannot breathe on it.

The solar system

There are many planets in our solar system, and some of them are really fascinating. Jupiter, for example, is a giant planet that is made of hydrogen and helium. Saturn has rings around it and Mars is the planet closest to our Earth.

Αλέξανδρος-Ταξιάρχης,
Κωνσταντίνος, Δ2

Jupiter

Jupiter is the biggest planet in our solar system. It is a gas giant which means that it has no surface to walk on. On Jupiter there are a lot of storms, and the "Big red spot" is the most famous one. This storm is so big and so violent that if it happened on Earth, it would destroy the entire planet. It is also interesting to know that a year in Jupiter lasts 4333 days. This means that its orbit around the sun is 11,8 times slower than the Earth's. Jupiter was named by the Romans because that was one of the strongest gods, as he was the god of the sky and of the thunder. Scientists say that Jupiter was known even before humans got to the moon.

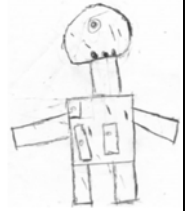

Ευστράτιος, Ιωάννης, Στ1

Robots

How are robots made? First designers and engineers design a robot on a computer. Then they build it with materials such as metal and plastic. But robots also need a "brain". This is usually a program that tells them what to do. Some robots can move, talk or even see using special applications. For these reasons, robots are very good to help us with our work.

Φίλιππος - Ωλίν, Λυδία, Ε2

Saturn

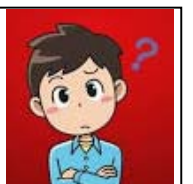

Saturn is a very interesting planet and has very good characteristics. For example, it has 274 moons and the largest of them all is Titan, which is also the most famous moon. It also has another beautiful characteristic. It has rings made of dust and giant rocks. Space is very interesting and especially Saturn.

The World around us

Greece

Greece is a Mediterranean country with a long history. It is a small country, but it combines archaeological sites, historic cities, coastlines and mountains, and many islands. Greece is associated with hospitality and many local traditions. Its modern culture also shows how food and social life are closely related in everyday routine.

Αλέξανδρος-Φώτιος, Ε2

Sparta

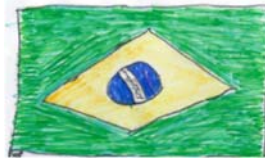

Modern day Sparta is a welcoming city. There is plenty to do there as you can visit the ancient Acropolis, the tomb of Leonidas and the archaeological site of Mystras. Sparta is a wonderful city at the heart of today's Lakonia and it has a famous history. But do you know what life was like for the ancient Spartans? The ancient Spartans loved military excellence. Spartan warriors trained from age seven. Spartan women had unusual freedom and education. Sparta won the Peloponnesian war against Athens in 404 B.C. The sites that still survive in Sparta give us a great understanding of its history.

The World of Food

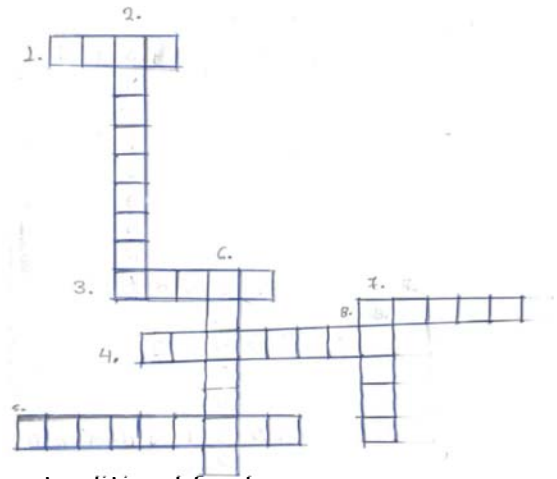

Ready-made meals

All over the world there are people who do not have enough time to cook and eat ready-made meals. For this reason, today we will look at the advantages and the disadvantages of these meals. The advantages are that they are quick and easy. It is not worth cooking for one person and food goes to waste. Also, people with a busy schedule can buy meals and heat them. This saves time. The disadvantage, however, is that these meals have a lot of fat and salt. This can make you put on weight, and it is not good for your health. Also, they have a lot of plastic packaging which is bad for the environment. So, in my opinion you need to eat them once, but not daily. In this way, you can stay healthy.

Chocolate Cake

Preheat the oven at 180°C. Mix all the dry ingredients together. For this, you will need 400gr of self-raising flour, 400gr of sugar, half a tbsp (tablespoon) of salt and 4 spoons of cocoa powder. After mixing the dry ingredients, add 200 gr of butter.

In a different bowl, mix four large eggs, 10 tbsps of evaporated milk and one of water. Finally mix all the ingredients together and bake in a big pan for 40-45 minutes. For the icing of the cake, you can beat 100 gr of butter with 2 tbsps of cocoa powder, 400 gr of icing sugar, a few drops of vanilla extract and 5 tbsps of evaporated milk. Spread the icing over the cake, add some sprinkles on the top and enjoy!

Τηλέμαχος, ΣΤ2

Favourite Snacks

Snacks can sometimes say a lot about you. For example, if you like sweet snacks, especially chocolate, you are likely to be agreeable and love to help others.

If you love spicy food, you mostly love risks and others say that you enjoy the adrenaline rush.

If you like potato chips you are a hard-working soul, you wish the best for anyone and try to achieve all your goals. Your favourite phrase is: "You tried your best and that's what matters".

If you love crackers, you pursue romance or you are the one who sleeps through everything.

If you love tortilla chips, you are a perfectionist and find it easy to get your hopes up.

If you like cheese you are loveable, but you may have an arrogant attitude against people you do not know well.

If you have an apple in your eye, or an apple in your pie because you enjoy a healthier snack, this means that you prefer to double-check everything before you leave your house or make sure you always keep your room clean.

Finally, if you love a juicy steak, you usually put others first and are like a Santa's little helper when it comes to your friends.

Mediterranean Diet

The Mediterranean diet shows a healthy way to eat. We should eat fruit, vegetables and nuts every day. Every week we should eat fish, chicken and eggs. We can also eat red meat two or three times a month, but we cannot eat sweets so often. The Mediterranean diet can help you stay healthy and live longer.

Ανδριανή, Ε2

Cooking Tips

To make a really good dish, you should follow some basic rules.

You should always wash your hands and wear an apron. You should keep to the exact recipe and prepare your dish with a lot of love. Finally, make sure you keep your kitchen clean and serve a dish tasty to all mouths.

Μαρία, Ε1

Souvlaki

Souvlaki is the most important food in Greece and Turkey. The most popular kind of souvlaki is made with roasted pork, tomato, onion, fries and garlic sauce. The word souvlaki comes from the medieval Greek word "souvla" which means skewer. This word is used in Macedonia and some parts in the North of Greece. In South Greece people call it "kalamaki".

Δανιήλ, Ε2

Easter

Easter is the most important holiday for Christianity and is celebrated by thousands of people around the world to remember the resurrection of Jesus Christ. People give and receive Easter eggs, cookies and buns. On the day before Easter Sunday, churches are filled with flowers, and we light a large candle. On Easter Sunday, in every home in Greece, families gather to roast lamb, eat mageiritsa and other Easter dishes. After Easter dinner, everyone chooses a hard-boiled egg dyed red and have fun trying to crack each other's egg.

Στυλιανός, Ε2

Dyeing the Easter eggs

Put water, onion skins and vinegar in a pot and let it boil for 30 minutes. Let it cool for 30 minutes and then remove the onion skins. Place the eggs in the dye and boil again for 15 minutes. When the eggs reach a deep red colour, put them on a plate to dry. Finally, rub olive oil on each egg to make them shine.
